

Welding Fire Blanket

Product Name : Welding Fire Blanket

Safety Plus Industrial Co.,Ltd is manufacturer and supplier Company, which produced the first integrated welding fire blanket and extinguishing system for fire fighting and protection industrial. Today, Safety Plus products are found in residential, commercial and industrial applications around the globe.

Introduction

Welding blankets are surface treated fiberglass fabrics with heat-resistance, high thickness and tight weaving, suitable for isolation and prevention in industrial and civil welding operation. According to the size of operation area, it can hang the blanket like curtain to isolate welding area and spread on the floor to effectively prevent the influence to people or goods at neighboring area caused by high-temperature welding sparks.

Welding Fire Blanket

Fire Blanket

Features and Advantages

1. Special treated fiberglass fabrics with heat-resistance.
2. High temperature resistance up to 900°C.
3. High thickness and tight weaving.
4. Different size optional.
5. Provides Thermal Protection From Sparks And Splatter.
6. Suitable for Use on small cooking oil fires and clothing fires.

Specifications

Model No.	Working tempt	Coat	Size
SP05-02-1	550°C	Heat Treatment	1.5*1.5m 1.0*1.2m 1.2*1.2m 2*2m 3*3m
SP05-02-2	550°C	Color	
SP05-02-3	300°C	Crylc Acid	
SP05-02-4	550°C	Heat Treatment	
SP05-02-5	900°C	Acid Treatment	
SP05-02-6	550°C	Heat Treatment	

Applications

Welding fire blanket is used for isolation and prevention in industrial and civil welding operation. Provides

Thermal Protection From Sparks And Splatter. It can used for small cooking fires and clothing fires.

Through development, safety plus continue to supply high quality products in fire fighting industrial that face our customers needs around the world. We have got certificate of AS/NZS, SBI EN, SABS, LPCB etc. Our dedication to customer service will exceed your expectations, and we will continue to earn your business each and every day.
